 MECHANICAL WARRANTY AND A 4,000-HOUR
 MUFFLE WARRANTY

Exclusive Muffle Design

The Summit muffle eliminates temperature variances and makes the oven ideal for everything from single units to large bridges.

Touch Screen Operation

Entering and editing programs is quick and simple with the high-resolution touch screen. Changes can be made mid-program.

Easy Program Transfer

Perform software upgrades and transfer programs rapidly between ovens through the USB port with the IBEX memory stick.

Shorten the Firing Cycle

The Summit's quick-cool fan blows air tangentially across the muffle opening, drawing the hot air out and truly lowering the temperature of the muffle - not just of the thermocouple - reducing cooling time by up to 50%.

EASY AND INTUITIVE PROGRAMMING

No more 'dialing in' program settings on your furnace. The SUMMIT's high-resolution touchscreen interface makes entering programs hassle-free. All program parameters can be entered or edited on one simple, comprehensive screen.

Large buttons allow users to scroll quickly through the 80-program list to make program selection simple. With the SUMMIT, users have the ability to edit running programs "on-the-fly", making last-minute changes a breeze.
